

The scatter plot displays data for two groups, Red and Teal, across two variables: hours per week (X-axis) and days per week (Y-axis). The X-axis ranges from 0 to 10, and the Y-axis ranges from 0 to 15. A horizontal line is drawn at Y=10. Red points are clustered in the upper-left and lower-right areas, while Teal points are more widely distributed, with a notable concentration in the upper-right area.
